Origo 6000 Built-In Oven With Stove

Free-Standing Alcohol-Fueled Appliance

Origo 6000

Durable and service free. The patented stainless-steel construction of the Origo 6000 simplifies cleaning and guarantees a long working life.

The Origo 6000 oven with double-burner stove offers the perfect solution to built-in, pressure-free cooking on board. Powered by alcohol fuel, the Origo 6000 features rugged stainless-steel construction that is easy to clean. The oven door's tempered glass front remains at a low temperature while cooking. The built-in thermometer — visible through the tempered glass front — helps you maintain the ideal cooking temperature. Gimbals keep the double-burner stove level in rough seas.

Origo alcohol stoves are easy to fill. Each alcohol-fueled container holds 40 oz. (1.2 liters) of alcohol fuel. Pour the fuel into the container where it is absorbed by the non-flammable material inside. A full container provides about four-and-a-half hours of cooking time at the maximum setting, or about 10 hours at normal setting before refilling is required.

Origo units are environmentally friendly and extremely safe. The denatured alcohol-fuel is a clean and renewable energy source, and eliminates the need for fuel lines or gas bottles that could leak or explode. The stainless-steel alcohol fuel containers will not leak if deformed by impact or if turned upside down.

Just like cooking at home. Light the burner and adjust the flame with the regulator knob. The flame diffuser spreads the heat over the base of the burner pan, giving 5,250 BTU/hr. (1,500 watts) at full heat. These Origo units can bring 34 oz. (1 liter) of water to a boil in 10 minutes. It's as efficient as cooking with gas, yet much safer and cleaner.

Key Benefits

- Alcohol-fueled spacious oven and double-burner stove.
- Single burner brings 34 oz. (1 liter) of water to a boil in 10 minutes.
- Tempered glass oven door front remains at low temperature while cooking.
- Easy-to-clean stainless-steel surfaces.
- Easy access to the alcohol fuel containers makes filling simple.
- Pressure-free alcohol offers a safe way to cook on board.
- Gimbals keep the double-burner stove level in rough seas.

Technical Specifications for Origo 6000

Model	No. of Burners	Fuel	Cooking Power[1] (BTU/hr/Watts)	Alcohol-Fuel Container Capacity (oz/liters)	Unit Dimensions (in/mm)			Dimensions w/Gimbals (in/mm)		
					Height	Width	Depth	Height	Width	Depth
Origo 6000	2	Alcohol	5,250/1,500	40.0/1.2	22.13/562	18.31/465	13.19/335	22.13/562	20.06/510	13.19/335

Notes:

[1] Cooking time approx. 4.5 hours at maximum setting and 10 hours at normal setting.

Accessories for Origo 6000

Smart Fuel

Dometic provides denatured alcohol (methylated spirits) fuel which burns with no odor or soot deposits. Alcohol fuel is used in combination with Origo's fuel containers (shown above).

Pot Holders

Origo pot holders fit into pre-made holes and clamp your pots and pans securely to the top of your Origo stove. They are easy to adjust and prevent pots from shifting or falling.

Cutting Boards

For Origo built-in and free-standing stoves, these handing cutting boards fold down onto the stove to provide an extra work space or storage area when the stove is not in use.
