

# WEATHERPRO POWER AWNINGS

Designed to out-think the elements, the A&E Systems WeatherPro power awning provides superior performance and great looks. To prevent damage to the awning or coach, a wind sensor closes the awning automatically when it detects high, sustained winds. The exclusive Knee Action Design™ allows the awning to automatically flex in moderate wind, avoiding nuisance retractions. In the event of rain, a unique spring arm mechanism automatically flexes to release accumulating water away from the door. This brings a clean, level, maintenance-free appearance to your RV.

## Choices in Colors and Materials

WeatherPro is available in double-sided vinyl or woven acrylic fabric in a wide selection of popular colors and patterns. So it's easy and fun to find the awning that perfectly matches your RV. Special hardware is available for mounting the awning over slideouts and on 5th wheels.

## Worry Free Technology

Just touch the button on the handy remote control or the switch mounted inside the coach, and the WeatherPro opens to your desired extension. Touch the button again and the heavy-duty motor in the roller tube retracts the awning, securely locking it for travel.

## WeatherPro Awning Features

### Applications

Motorhomes • Fifth wheels • Travel trailers

### Engineering and Technology

**Solid-state wind sensor** automatically retracts the awning in strong winds for increased protection.

**Hand-held wireless remote** extends and retracts the awning quickly and easily. Also controls your A&E Oasis™ power door awning.

**Rugged metal weathershield** is standard.

**No locks** or travel latches required.

**Exclusive Knee Action Design™** allows the awning to automatically flex in moderate winds to prevent damage.
