

## proSafe MDT 400 L

### Disguised beauty: the built-in drawer safe

The same idea, another way: this pull-out safe is completely integrated in an existing drawer. No handle, no contrasting colour, no keypad to disturb the harmony of the furniture front – ideal for refined interior architecture. The special door design allows ergonomic access from above: just enter the code and the hydraulic arm lets the lid gently swing open. Light falls in from above. All of the safe's "inner riches" are clearly visible and in convenient reach.

- **Can be installed into an existing drawer,** desk or bedside cabinet
- **Hydraulic arm** ensures automatic opening and safe closing
- **Closing system:** automatic motor locking
- **Electronic lock**
- **Emergency access:** masterkey and mastercode or webREOS
- **Illuminated LED display**
