

DOMETIC MEDICAL SYSTEMS - PRESS RELEASE -

Dometic launches new “Silver” models

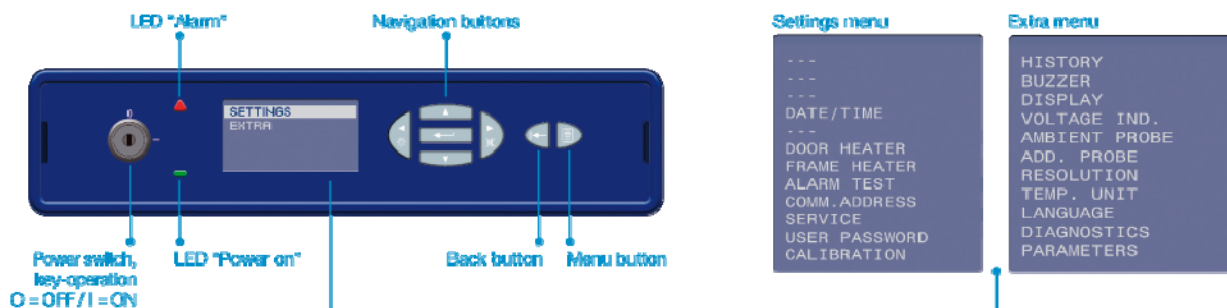

From November 2009 on, Dometic Medical Systems will launch its new „Silver“ models (corresponding to the **Dometic Silver Safety Standards**). The main innovation brought to these devices is the sophisticated Dometic Electronic which was already launched with the “Gold” models (**Dometic Gold Safety Standards**) one year ago.

The feedback of the market was very positive regarding the user-friendly menu structure as well as the enhancement of product safety due to the password protected settings menu.

What is the Dometic Electronic able to do ?

The new and innovative Dometic Electronic (operation and control panel) assures thanks to its password protected settings menu optimum protection for your stored preparations.

The menu structure of the modern and user-friendly graphic display offers a simple and intuitive utilization.

Beside this the new Dometic Electronic offers :

- Wide range of adjustment and diagnostic facilities as well as additional protection / warning operations (via external alarm operations, histories and individual display signals).
- An optional PT 100 sensor inlet to show the sensor's temperature data on the display as well as forwarding and further processing via a 4 ... 20 miliA outlet.
- An optional 20 miliA outlet to transmit temperature data of a sensor connected to the electronic.
- Connection facilities for additional (optional) temperature sensors.
- DMN (Dometic Monitoring Network) and the (optional) DCU (Dometic Communication Unit) allows to illustrate texts on the product's display.

Overview of the renamed Silver models:

old name	new name
ML 155	ML 155 S
ML 295	ML 320 S
ML 305 C	ML 360 CS
ML 405	ML 355 S
ML 605	ML 580 S
ML 1205	ML 1300 S
MP 155	MP 155 S
MP 295	MP 320 S
MP 305 C	MP 360 CS
MP 405	MP 355 S
MP 605	MP 580 S
MP 1205	MP 1300 S
MF 125	MF 110 S
MF 295	MF 250 S
