DOMETIC PRESENTS COMPACT BUILT-IN DRAWER REFRESHMENT CENTER

ELKHART, Ind. – The DM50 drawer refreshment center is the newest in Dometic’s Design Series of hotel refreshment centers. With a distinctive urban architectural style, it appeals to hotel designers creating updated guest rooms. The versatile compact size means designers can move away from traditional installation and put the refreshment center into more creative and convenient places such as bedside tables, allowing designers the freedom to eliminate the armoire altogether.

Functionally, the DM50 has a 45-liter capacity with a large lower drawer for standard-size bottles and cans and a smaller upper drawer for miniature bottles and snacks. It’s available with a Dometic door décor panel and pull handle or customizable unique wooden door panel and handle with optional exterior lock. The DM50, like all Dometic products, meets ISO certification standards.

For more information, visit the Hotel Refreshment Centers page at www.Dometic.com/Hotel or contact Peter Kuzyk at Dometic LLC, P.O. Box 490, Elkhart, Ind. 46515, 800-301-8118.
