

Dometic Environmental Policy

Adopted by Dometic Group Management

Introduction

We strive to improve the environmental performance of our activities and products and to prevent any harmful effects on the environment. All of our activities and products should comply with regulations and demands made by authorities as well as by customers. We are committed to the efficient use of natural resources and to sustainable development. This means efficient use of materials and energy during the design, production, purchase, logistic, use and disposal of all our products. We put our environmental policy into practice through our environmental program and environmental management systems policy.

Policy

Continuous improvements

Key figures regarding our activities and the environment are collected each year and provide a platform for continuous improvements of the environmental performance of our production and products. We aim at raising the environmental awareness of our employees and business partners.

Prevention of pollution

We strive for optimal use and minimize release of hazardous substances. It is our ambition to reduce the environmental impact of our products and their production. This is achieved through our R&D process and through our compliance system where all factories work towards prevention of pollution and other aspects of incompliance.

Fulfill legal requirements

As a growing company on the global market, Dometic Group faces every day new regulations and standards. Within the Dometic Group, it is each business entity's responsibility to ensure that they comply with all necessary legal requirements. Voluntary agreements are supported and should apply where appropriate.

Sustainability

Dometic Group's environmental policy is based on a life cycle approach. It means that a product's environmental impact (energy and material demand, emissions, waste generation and recyclability) is evaluated during the different life phases (production phase, usage phase and end-of-life phase), when objectives and targets are set in the environmental program.

Transparency

Information regarding Dometic Group's environmental work shall be easy accessible for employees, customers, business partners and any other interested parties. Our Environmental Policy is available to all employees and the public through our website: dometic.com.
