RE: 7100 & 7200 Macerator Toilet Product Line Simplification & Product Enhancement

Dometic Marine continues to look for ways to simplify our offerings while increasing the value of our products to our customers. Our entry level macerator toilet product lines (model families 7100 and 7200) will be reduced in model variations while increasing the functional value of most new models. The new item numbers for all models that will replace the current models are listed below. Please note that then new item numbers no longer have legacy item numbers associated with them.

We will be launching these new items on April 1st, 2024.
